Guide to Everything AI at HLTH 2024

Elion

About the Guide

Artificial intelligence is transforming healthcare, and HLTH 2024 offers a unique opportunity to explore a cross-section of AI solutions from facility management and revenue cycle solutions to clinical applications like CDS. However, this dynamic space is complex, with emerging AI-first vendors, incumbents adding AI features, and a handful of large language models (LLMs) making big news seemingly every week.

In this complicated market, it can be difficult to distinguish the signal from the noise. This is where Elion comes in.

We've reviewed the HLTH 2024 vendor list and event schedule to create a concise, actionable guide to the AI vendors, industry leaders, and events at HLTH so you can dial-in on the most impactful ways to spend your limited time on the ground.

HLTH 2024

This year, the HLTH conference will be hosted from October 20–23 at the The Venetian Expo Center in Las Vegas, Nevada. More details—on their full agenda, exhibitor list, and more—are accessible on their website.

Who This Guide Is For

This guide is specifically designed with the **provider organization technology decision-maker** in mind. If you're responsible for making healthcare IT purchasing decisions—particularly AI-enabled solutions—for a practice or health system or simply looking to stay abreast of the changing market, we're here to help you.

Who Is Elion

Elion is a leading vendor research and intelligence organization. We help decision-makers across provider organizations make better technology and vendor selections, with a specialized focus on AI-driven solutions.

In addition to industry-leading and actionable guides like this one, we also offer robust vendor listings, market maps, and one-to-one guidance.

Let's Connect

Whether you're just starting to explore AI use-cases or are in the weeds currently evaluating specific solutions, we'd love to help. **Reach out using this quick form**, and we'll get in touch ASAP.

Exploring AI Solutions? More Resources to Guide Your Buying Decisions

AI Revenue Cycle Management

The U.S. healthcare system is undergoing a transformative shift as AI is being applied to nearly every aspect of administration and clinical care. Within the context of revenue cycle management (RCM), AI-driven solutions claim to streamline eligibility verification, automate claims processing, enhance coding accuracy, and improve patient payment collections.

But, can vendors deliver on these promises today? **Download Elion's 29-page State of AI in RCM 2024 Report** to learn more.

AI Ambient Scribes

It feels like most provider organizations today, large and small, are currently investigating AI scribe vendors given the promise these solutions show in addressing their biggest pain points.

Evaluating them can be difficult though, given the novelty of the technology and the rapid pace at which they're evolving.

Download Elion's 2024 Buyer's Guide to AI Scribes to help navigate you vendor selection journey.

AI Clinical Copilot Deep Dives

We'll be releasing our guide exploring the technology behind and differentiators for AI copilot tools like ambient scribes and AI clinical summary tools. Make sure you're **subscribed to our email newsletter** to be the first to receive it.
